**Primaprint SPLORR Developer/Replenisher - 140150 6x10L**  
**Replaces**

**Primaprint SPLORR Developer/Replenisher - 140194 6x10L**

Champion Photochemistry is pleased to inform you that we will be introducing a new version of its besting selling Primaprint SPLORR Developer / Replenisher Developer.

Primaprint SPLORR Developer/ Replenisher - 140150 is designed to run alongside any of the Bleach-Fix offerings in the Champion range, but the optimum combination will be with Naturecare SNR Bleach-Fix running at a replenishment rate of 54mls sqm as this gives the optimum value, stability and effluent to drain and cost in use benefit.

It is a **Drop in Replacement** and can be replenished straight in with no change in replenishment settings.

It is advisable to consult the updated Technical Datasheet (TDS)- R18 for the required parameters which is available from our website or our Service Plus Team will be happy to assist and email it.

Primaprint SPLORR Developer / Replenisher - 140150 will be introduced on a stock roll over basis into all markets over the coming months and AD's who are interested to take it should contact their local Champion Sales Contact or Service Plus Department direct.

If you have any questions regarding the product, please do not hesitate to contact your Champion Sales Contact or our Service Plus department direct who will be only too happy to forward your query to the relevant person.
